

Fair Value Analysis of Mersive Technologies, Inc.

Valuation as of
September 30, 2019

November 2, 2019

Disclaimer and Confidentiality Statement

This report (“Report”) has been prepared by Lincoln Partners Advisors LLC (“Lincoln” or “we”) from materials and information supplied (whether orally or in writing) by or on behalf of OpenGate Capital (collectively with its subsidiaries and affiliates, “OGC”) as well as publicly available data and information. This Report is delivered subject to the conditions, scope of engagement, limitations and understandings set forth herein and in our engagement letter dated November 17, 2016. The valuations herein shall represent the findings of Lincoln based solely upon the information furnished by or on behalf of OGC, and other publicly accessible sources, and shall be considered advisory in nature only.

In arriving at the valuations herein, Lincoln has relied upon and assumed the accuracy and completeness of the financial information supplied to us and considered in our analysis, and we do not assume any responsibility for independent verification of such information. The valuations herein assume that information and representations made by management regarding the portfolio companies are accurate in all material respects. For those cases in which information was not available as of the valuation date, Lincoln assumed that there was no material change between the date of the most current information provided to us and the valuation date.

Our valuations herein are based on a limited scope analysis, primarily based on information provided by OGC and discussions with the management of OGC. Lincoln has not made any independent valuation or appraisal of the assets and liabilities of any portfolio company, has not visited or made any physical inspection of the portfolio companies and has not interviewed the management of the portfolio companies.

Our analysis and the valuations herein are necessarily based on general economic, financial, market, operating and other conditions as they exist and can be evaluated by us as of the valuation date and must be considered in that context. Unanticipated events and circumstances may occur and actual results may vary from those assumed. The variations may be material. Lincoln makes no warranty and is not responsible for losses or damages arising out of errors, omissions or changes in market factors, or any conditions and circumstances beyond its control. Except where otherwise indicated, the analysis in this Report speaks as of the valuation date. Under no circumstances should the delivery of this Report imply that the analysis would be the same if made as of any other date.

In arriving at the valuations herein, Lincoln has relied upon certain statements, estimates and projections provided by OGC with respect to the historical and anticipated future performance of each portfolio company. Such statements, estimates and projections contain or are based on significant assumptions and subjective judgments made by management of OGC. These assumptions and judgments may or may not be correct, and there can be no assurance that any projected results are attainable or will be realized. Lincoln was not requested to and has not attempted to independently verify any such statements, estimates and projections, and as such, Lincoln makes no representation or warranty as to, and assumes no responsibility for, their accuracy or completeness and for the effect which any such inaccuracy or incompleteness may have on the results or judgments contained in this Report.

Disclaimer and Confidentiality Statement (continued)

THIS REPORT AND THE VALUATIONS PROVIDED HEREIN ARE FOR THE INFORMATION AND ASSISTANCE OF, AND INTENDED FOR USE BY, THE MANAGEMENT OF OGC ONLY. THIS REPORT IS NOT INTENDED TO BE USED, OR RELIED UPON, AND MAY NOT BE USED OR RELIED UPON, BY ANY OTHER PERSON. THIS REPORT IS CONFIDENTIAL AND SHOULD NOT, WITHOUT THE PRIOR WRITTEN CONSENT OF LINCOLN, BE COPIED, SUMMARIZED, QUOTED, REFERRED TO, DISTRIBUTED OR OTHERWISE MADE AVAILABLE TO ANY PERSON OTHER THAN THE MEMBERS OF THE MANAGEMENT OF OGC. LINCOLN SHALL NOT HAVE LIABILITY, WHETHER DIRECT OR INDIRECT, IN CONTRACT OR TORT OR OTHERWISE, TO ANY PERSON IN CONNECTION WITH THIS REPORT.

We have acted as an independent financial advisor to the management of OGC and will receive a customary fee from OGC for our services. Our fees are not contingent upon the valuations provided herein, and neither Lincoln nor any of its employees have a present or intended financial interest in OGC or the portfolio companies unless otherwise disclosed to OGC. We may have rendered in the past or may render in the future certain financial advisory services to the portfolio companies or parties involved in transactions with the portfolio companies.

We have not been engaged to identify prospective purchasers or to ascertain the actual prices at which and terms on which each of the portfolio companies could currently be sold. No opinion, counsel or interpretation is intended for use in matters that require legal, accounting, tax or other professional advice. It is assumed that such opinions, counsel or interpretations have been or will be obtained from the appropriate professional sources.

Executive Summary

Section 1

Executive Summary

Terms of Engagement

- Lincoln Partners Advisors LLC (“Lincoln”) has been retained by OpenGate Capital (“OGC”) as an independent financial advisor for the purpose of providing written valuations (each, a “Valuation”) as of September 30, 2019 (the “Valuation Date”) of certain control, affiliate and non-control/non-affiliate investments of preferred stock, common stock, membership interests and warrants (individually, the “Investment”; collectively, the “Investments”). The portfolio company in which OGC owns an Investment is herein referred to as the “Portfolio Company.” The Valuation will be used by OGC to assist with its determination of the fair value of the Investment in accordance with the fair measurement principles of Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosure (ASC 820), issued by the Financial Accounting Standards Board (FASB).

Scope of Analysis

- In connection with Lincoln’s activities on behalf of OGC and the performance of its services hereunder, we have, among other things:
- Reviewed credit agreements and amendments for debt when available;
- Reviewed audited and/or unaudited financial statements when available, as well as internal financial statements as provided by OGC, for the most current period prior to the close of the quarter;
- Reviewed certain business, financial and other information relating to the Portfolio Company, including financial budgets or forecasts prepared by management of the Portfolio Company;
- Reviewed investment report memoranda prepared on the Investment by OGC;
- Discussed with OGC the investment thesis and business, financial outlook and prospects of the Portfolio Company;
- Reviewed certain financial and other information for the Portfolio Company and compared that data and information with certain stock trading and corresponding data and information for companies with publicly traded securities that we deemed relevant; and
- Considered such other information, financial studies, analyses and investigations and financial, economic and market criteria that we deemed relevant.

Financial Metrics and Company Valuation

Lincoln Valuation Assumptions

Fair Value Conclusion

- LTM revenue increased 14.1% from the prior period
- LTM revenue and 2019E revenue used as Valuation Drivers consistent with the prior period; Lincoln valued Mersive based on revenue multiples given the industry it operates in and the near-term fluctuations in earnings expected as the company scales
- Mersive has continued to outperform underwriting expectations on a revenue basis; however, EBITDA has been volatile due to the company's continued investment into the business; given the nature of the company's operations, Lincoln included the change in deferred revenue as an adjustment to EBITDA to reflect the company's cash EBITDA

- Selected LTM revenue multiples were unchanged while NCY revenue multiples were revised up slightly in the selected public companies analysis reflecting higher expected revenue growth for Mersive as compared to the selected public companies
- Selected LTM revenue multiple in the precedent transaction analysis maintained from the prior period; Lincoln incorporated an NCY multiple range in the current period to account for expected financial performance
- DCF revenue exit multiple of 1.4x is consistent with prior period and in line with the low end of the 2019E revenue multiple utilized in the selected public companies' and precedent transactions analyses

- Estimated enterprise value increased 4.6% from the prior period due to growth in LTM revenue
- OGC's common value is 52.7% above cost due to a higher estimated enterprise value since close, primarily driven by revenue growth (155.1% growth since close)

Note: All tables express USD in thousands unless otherwise noted

(1) Represents FY2017E at the Initial Investment Date

(2) Represents FY2018E at the Initial Investment Date and FY 2019E in the prior period and current period

(3) Prior period and current period results reflect the change in accounting policy relating to maintenance contracts and adoption of ASC 606; prior period and current period LTM EBITDA includes adjustment for change in deferred revenue

Business and Transaction Overview

FY 2017E EBITDA ⁽²⁾	3,200			
Implied 2017E EBITDA Multiple	13.8x			

Business and Transaction Overview

- Mersive provides a wireless media streaming and collaboration software solution for corporate, education, and government markets. It offers Solstice, a software solution that enables multiple users to connect to a shared display using computers, tablets, and phones wirelessly. The company was founded in 2004 and is based in Denver, Colorado.
- On December 15, 2017, OpenGate Capital (“OGC”) purchased Mersive for \$44.3 million, or 3.0x 2017E revenue. The transaction was financed with \$40.8 million of equity and a \$3.5 million Revolver draw.

Underwriting Considerations

- Mersive operates in a large and growing market as conference room screen sharing is a major pain point for corporate, education, and government customers. The conference room screen sharing market grew at a 41.0% CAGR from 2012 to 2017. Additionally, the industry is in its early stage as approximately 175,000 conference screen sharing software units were sold in 2016 in comparison to the 10.5 million addressable conference rooms in the United States and Europe alone.
- Mersive offers a differentiated product with the potential to grow in conjunction with the overall market and win market share. Mersive is one of the more attractive players in the industry given its historically high gross margins and recurring revenue base. The company’s customer base consists of over 100 Fortune 500 companies, 17 of the top 25 higher education institutions, and 120 government organizations.
- The company is led by an experienced management team, as Rob Balgley, the CEO, has over 25 years of start-up experience. Additionally, the founder and CTO Christopher Jaynes has written over 100 technical articles and has 15 patents.
- Mersive’s existing business, with additional capital invested in sales and marketing to capitalize on its market and product leadership, has the potential to grow to over \$100.0 million in revenues.

Source: Funds Flow, Mersive IC Model

(1) \$3.5 million total commitment

(2) Does not include an adjustment for the change in deferred revenue

Business and Transaction Overview (continued)

Recent Developments

- In Q4 2018, Mersive changed its accounting policy for maintenance contracts and completed an early adoption of ASC 606. Previously, revenue was recognized at the time of sale for maintenance contracts. As a result of the change, revenue is now recognized ratably over the maintenance period of one year. Additionally, as a result of the adoption of ASC 606, revenues in the historical periods shown on the following page have been restated.
- Mersive launched its software as a service (“SaaS”) product in Q4 2018, which allows customers to track usage data of Solstice. Currently, the product is bundled with the sale of Solstice pods and is included at no added cost to the consumer. The company is evaluating how to price the product and projections do not include contributions from SaaS sales.

Source: Mersive Q2 2019 5 Year Plan

(1) Adjustments relate to the change in long-term deferred revenue

Financial Overview (continued)

Commentary

- As a result of the company's change in accounting policy for maintenance contracts and adoption of ASC 606, operating results were restated for FY 2017 and beyond. Previously, Mersive recognized all revenue for maintenance contracts at the inception of the contract.
- Mersive has grown revenues at a 78.1% CAGR from 2016 to 2018, as the company has expanded its customer base significantly while also turning the corner to profitability in 2016. The strong customer network established has led to increased repeat orders from existing customers.
- On a GAAP basis, the company expects FY 2019 EBITDA to decrease 13.4%. This decrease is largely attributable to the expected increased investment in the business, primarily in product development and sales and marketing.
- When considering the free cash flows of the company used in the DCF analysis, Lincoln adjusted working capital to include the change in short-term deferred revenue and separately added the change in long-term deferred revenue (as opposed to adjusting EBITDA) to arrive at unlevered free cash flows in order to appropriately calculate the company's projected taxes.

Market Approach – Selected Public Companies Analysis

	Weighting	Selected Multiples		Mersive Financial Statistic	Enterprise Value			
		Low	High		Low	Mid	High	
Last Twelve Months:								
Enterprise Value / Revenue	50.0%	1.90x	2.10x	\$ 37,251	\$ 70,776	\$ 74,501	\$ 78,226	
Next Calendar Year:								
Enterprise Value / Revenue	50.0%	1.50x	1.70x	43,271	64,907	69,234	73,561	
Selected Public Companies Indication of Value					\$ 67,842	\$ 71,868	\$ 75,894	

Commentary

- Lincoln concluded valuation multiple ranges of **1.90x to 2.10x LTM Revenue** and **1.50x to 1.70x 2019E Revenue**, consistent with the prior period for the LTM multiples and an increase of 0.20x at the midpoint for the NCY multiples.
- In concluding on its valuation multiple range, Lincoln considered the following:
 - Lincoln selected public companies in the application software industry who serve comparable end markets and experience similar supply and demand economics as Mersive. The selected companies provide a general proxy for market movements and represent industry multiples as a whole. Lincoln valued Mersive using revenue multiples given many industry participants reported negative EBITDA and Mersive is expecting EBITDA volatility in the near-term as it continues to invest in the business. Additionally, the use of a revenue multiple negates the impact of the change in accounting policy and its effect on GAAP versus cash EBITDA.
 - Lincoln established its LTM revenue valuation range with consideration to OGC's initial acquisition of Mersive for 3.0x in December 2017. Given the stability in LTM revenue multiples of the selected public companies, Lincoln maintained the selected EV / LTM revenue multiple range from the prior period. The midpoint of the concluded range reflects a 61.1% discount to the Adjusted Mean EV / LTM revenue multiple of the selected public companies. Mersive's smaller size and lower projected EBITDA growth offer support for the discount.
 - Lincoln established its forward valuation range with consideration to the increase in the EV / NCY revenue multiples of the selected public companies from close. The concluded EV / 2019E revenue multiple range for Mersive increased slightly from the prior period given the higher projected revenue growth as compared to the selected public companies and implies a discount of 66.6% to the NCY Adjusted Mean revenue multiple of the selected public companies due to similar factors noted for the discount to the LTM revenue multiples of the selected public companies.

Precedent Transactions Analysis Indication of Value					\$ 67,842	\$ 71,868	\$ 75,894		

Commentary

- Lincoln concluded a valuation multiple range of **1.90x to 2.10x LTM Revenue** and **1.50x to 1.70x NCY Revenue**.
- In concluding the valuation multiple ranges, Lincoln considered the following:
 - Lincoln referenced the implied revenue multiple at the close of the December 2017 transaction of 3.0x and the identified transactions below in the application software industry that involve acquisition targets similar to Mersive:
 - Lincoln identified M&A transactions with publicly disclosed deal metrics. The identified transactions have an Adjusted Mean LTM revenue multiple of 2.0x. Lincoln did not identify any additional relevant transactions in the current period and therefore maintained the selected LTM multiple range. Additionally, Lincoln's NCY multiple range considers the 1.80x NCY revenue multiple implied at close, in line with the high end of the concluded range. Lincoln weighted in a forward revenue multiple range to capture the company's expected growth in addition to current performance.
 - Further, Lincoln identified one relevant precedent transaction in which Lincoln acted as an advisor in the deal (specifics of the deal not disclosed for confidentiality purposes). The LTM revenue multiple implied by the transaction was 2.5x. No additional transactions in which Lincoln acted as an advisor in the deal were identified since the prior period.
 - Additionally, Lincoln viewed statistics from GF Data, which aggregates closed deal information for middle market companies, from the Software Publishers industry. GF Data presented an average LTM revenue multiple of 2.6x. No new GF Data transactions were identified since the prior period.
 - Lincoln's maintained its concluded multiple range since the prior period as the midpoint is in line with the Adjusted Mean multiple of the precedent transactions.

Implied Perpetual Growth Rate	4.3%	3.8%	3.4%	5.0%	4.5%	4.1%	5.6%	5.2%	4.7%	

Commentary

- Lincoln sensitized the selected discount rate of 15.0% by +/- 50 bps and the exit multiple of 1.40x by +/- 0.10x. The concluded exit multiple aligns with the midpoint of the selected NCY revenue multiple range concluded in the selected public companies analysis.
- The discounted cash flow analysis results in an enterprise value range of \$62.7 million to \$71.8 million. This range of enterprise values implies multiples of **1.7x to 1.9x LTM Revenue** and **1.4x to 1.7x 2019E Revenue**.

(2) Revolver balance as of September 30, 2019

Summary of Valuation Methodologies

Appendix A

Valuation Methodology and Key Assumptions

Overview

- Lincoln utilizes several methodologies to estimate the fair value of the Investments. Lincoln's fair value estimates are generally expressed as a range and are considered by the Client in its determination of a single estimate of fair value for each individual security.

Definition of Fair Value

- The valuations presented herein reflect the ASC-820-20 definition of "fair value" defined as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date."
- The valuation method for each Portfolio Company varies depending upon industry and company specific considerations. We generally perform a fundamental analysis to establish a risk profile for each company in addition to the application of one or more of the following: (i) market method; (ii) income method; and (iii) enterprise valuation waterfall method.

Fundamental Analysis

- A fundamental analysis of each Portfolio Company considers such factors as major developments affecting the business, financial outlook, industry dynamics, overall risk profile and other qualitative factors impacting valuation. These considerations are discussed throughout the Report.

Valuation Methodology and Key Assumptions

Market Method

- The market method values the enterprise value of each Portfolio Company based on the observable prices of similar companies. We consider comparable public companies and precedent M&A transactions for both public and private companies, if available. Lincoln also draws on its institutional knowledge of private middle-market M&A valuations.
- The Market Method involves the determination of representative levels of earnings or other operating metrics, such as operating income (EBIT) and earnings, before interest, taxes, depreciation and amortization (EBITDA). Normalizing adjustments may be made based upon the facts and circumstances such as add-backs to EBITDA for non-recurring items. Lincoln selects an appropriate range of market multiples based on analysis of comparable public companies and/or M&A transactions as of the measurement date. We then apply the selected market multiples to the Portfolio Company to determine its enterprise value.
- Because many of the Portfolio Companies are often smaller than larger, publicly-traded companies, the private company M&A metrics may be used.

Income Method

- The discounted cash flow method (DCF) estimates the present value of the projected cash flows to be generated by the subject company. In the DCF approach, a discount rate is applied to the projected future cash flows to arrive at its present value. The discount rate is intended to reflect all risks of ownership and the associated risks of realizing the stream of projected cash flows.
- Generally, multi-year forecasts for the Portfolio Companies are not available and, as such, the Income Method is used infrequently as a primary method to determine enterprise value. Lincoln may, however, corroborate the reasonableness of its determined multiples derived under the Market Method using the Income Method, based on various estimates and assumptions.
- Lincoln may also utilize a leverage buy-out (LBO) analysis to determine the enterprise value based on a third-party investor's required rate of return over a typical hold period.

Certifications

Background of Patricia J. Luscombe, CFA

Patricia is currently a Managing Director and Co-Head of the Valuations & Opinions Group at Lincoln. Ms. Luscombe joined Lincoln in August 2007. She has more than 20 years experience in financial advisory and valuation services. She has delivered a broad range of corporate finance advice that resulted in the successful completion of corporate transactions and valuation and fairness opinions. Ms. Luscombe has advised portfolio companies of private equity firms and provided them with fairness opinions for transactions, including divestitures and recapitalizations, intra-fund transfer, and fair value accounting. Ms. Luscombe has also advised Boards of Directors of public companies and rendered fairness opinions in mergers and acquisitions and going private transactions. In addition, she has worked with the valuation of many closely held businesses for corporate transactions including acquisitions and divestitures, leveraged buyouts and restructuring/recapitalizations, ESOPs, and related party transactions, for general tax, accounting, litigation and regulatory purposes.

Previously, she spent 16 years at Duff & Phelps Corporation as a Managing Director in the firm's valuation and financial advisory business. Ms. Luscombe was a founding member and Managing Director at Duff & Phelps in a management led buyout which occurred in 1995. Prior to joining Duff & Phelps, Ms. Luscombe was an associate at Smith Barney, a division of Citigroup Global Markets, Inc. where she managed a variety of financial transactions, including mergers and acquisitions, leveraged buyouts and equity and debt financings.

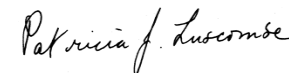

Ms. Luscombe is a member of the Chicago Chapter of the Association for Corporate Growth, the Chartered Financial Analyst Society of Chicago and a former president of the Chicago Finance Exchange.

Ms. Luscombe holds a Bachelor of Arts degree in economics from Stanford University, a Master's Degree in economics from the University of Chicago and a Master of Business Administration degree from the University of Chicago, Booth School of Business.
